

CME Co-Location Services

The lowest latency connection to the CME Globex platform with the power and space to grow.

CME Co-Location Services—comprised of hosting, connectivity and support services—will launch early 2012 at our new, state-of-the-art data center.

CME Co-Location Hosting Services— Power and Space

Our hosting services, designed to support electronic trading, will maximize reliability and availability for our customers' IT equipment.

The CME Group co-location facility in Aurora, IL is over 428,000 square feet and is served by two 138,000 volt transmission quality utility services from two separate generation plants through our privately owned and operated substation. This substation provides for up to 92MW of redundant power (184 MW of total power).

Our co-location facility is based on a Tier 3 design with many additional security, fire protection, and infrastructure enhancements.

CME Co-Location Hosting Services includes:

- Licensed Space
 - A dedicated cabinet or dedicated cage environment, to contain customer equipment within the data center.
- Power
 - Two tiers of maximum power capacity per licensed cabinet space, 8.5kW or 17kW. AC Power is available in a variety of power strip configurations.
- Data Center Environmentals
 - A specialized, controlled environment for hosting customers' trading infrastructure supported by a Service Level Agreement.

Sign up today.
Application period:
October 1 – 27, 2010

CME Co-Location Connectivity Services— Lowest Latency and Equidistant

Our data center facility, co-located with CME Group's trading match engines, allows for the lowest latency connectivity possible for all products traded on the CME Globex platform. Connectivity to the CME Globex platform utilizes an equidistant Cross Connect to ensure location neutrality within the co-location data center.

In order to support our customers' telecommunication requirements, the facility has multiple diverse entrances, redundant carrier rooms, and a carrier-neutral, open access telecommunications policy that provides for flexibility in architecture and choice of carriers for connectivity into and out of your co-location space.

CME Co-Location Connectivity Services includes:

- CME GLink
 - CME Group equidistant connectivity to the CME Globex platform. Connection to CME Globex platform provides 1 Gbps of bandwidth delivered as two pairs of single-mode fiber with LC connectors.
- Cross Connects
 - Customers may use Cross Connects to connect to other customers, carriers or content providers.
- Utility Networks
 - Utility Networks is a set of network services used to aid customers in implementation and maintenance of their infrastructure co-located at our data center. These services include:
 - Network Time Protocol, GPS antenna access
 - Wireless Internet Access
 - Internet Access
 - Remote Access

CME Co-Location Support Services— Improved Support and Responsiveness

The CME Group co-location facility is designed to provide the highest levels of support and security for the electronic trading environment. Our support services are designed to give customers the flexibility they need to maintain and service their equipment, including shipping and receiving services as well as onsite technicians.

Utilizing CME Group's Remote Hands or customer's own authorized technicians; co-location customers will have 24x7x365 access to their licensed space following certain policy restrictions and maintenance windows.

CME Co-Location Support Services includes:

- Remote Hands
 - Designed to provide co-location customers with an always available data center presence, Remote Hands provides you the ability to:
 - Outsource routine support and maintenance.
 - Rapidly address hands-on needs where speed is paramount.
 - Receive assistance in emergency situations. Our co-location data center engineers are able to access your equipment more quickly than customer technicians.
 - Minimize costs associated with customer technician dispatch.
- Shipping and Receiving
 - Customers have the ability to easily ship or receive equipment items to/from the co-location services facility. All requests are secure and tracked with frequent status updates provided to customers.
- Customer Support Portal
 - Online requests are quickly supported through a single customer-friendly interface. Customer requests can be submitted and managed 24x7x365.
 - Additional details will be available in Q4 2010.
